SUMMARY

Process Transformation Expert with over seven years of experience in delivering data-driven systems, automation, and decision-support solutions in regulated, high-complexity environments. Proven ability to design analytical frameworks, translate business problems into technical solutions, and deploy scalable workflows leveraging automation, analytics, and AI-enabled tools. Currently expanding hands-on expertise in large language models (LLMs), text mining, and data modeling, with a focus on applying AI techniques to real-world business workflows.

EXPERIENCES

Process Transformation Engineer (Hybrid) | Comerica Bank (Commercial Bank)

2/2025 – Present

- Developed detailed AS-IS (current state) and TO-BE (future state) process maps, proposing suggestions that projected up to 60% reduction in key risks through the addition of appropriate preventive controls and streamlined workflows.
- Created comprehensive AS-IS and TO-BE process maps for restitution handling, recommending targeted enhancements and preventive controls that projected up to 60% reduction in key compliance and operational risks (including fraud exposure, payment errors, and regulatory violations) by embedding robust mitigation measures.
- Built and deployed an automated workflow intake and tracking solution using Power Apps, SharePoint, and Power Automate, reducing manual coordination effort by 90%.
- Took ownership of assigned workstreams, managing initiatives from planning through execution and ensuring delivery within established timelines.

Continuous Improvement Expert (Remote) | Snapp (ride -share application)

11/2020 – 12/2023

- Executed and scaled enterprise-wide process improvement initiatives, increasing productivity by 35% and supporting CRM system modernization.
- Led a large-scale technology-enabled process transformation, improving end-to-end process efficiency by 75% with minimal operational disruption.
- Conducted research on best practices and managed change leadership workshops, increasing stakeholder engagement by 45%.
- Supported operational enablement for new mobile app features (including Face ID) while leading RPA adoption that automated 65% of backend operational tasks.
- Developed performance metrics and KPI dashboards, enabling data-driven improvements that increased team efficiency by 80%.

Process Excellence Expert | Hyper-Me (retail chain store)

01/2018 – 11/2020

- Analyzed and mapped key business processes, breaking down complex problems using hypothesis-driven analysis to identify inefficiencies and improvement opportunities.
- Utilized advanced data analytics and KPI dashboards in SharePoint to generate insightful reports, increasing employee engagement by 30%.
- Conducted performance analysis and tracked progress to ensure sustainability of improvements.

Business Process Analyst | Shatel (Internet and Cloud Services)

06/2015 – 12/2017

- Analyzed and redesigned end-to-end workflows during major organizational restructuring using data analysis and performance metrics, improving operational efficiency by 25% and productivity by 30%.
- Developed frameworks, playbooks, and documentation to support scalable execution and continuous improvement, improving employee engagement by 20%.

- Collaborated with cross-functional teams to implement technology rollouts and ensure operational alignment.

Business Process Improvement | Melat Bank (financial services organization)

04/2013 – 05/2015

- Delivered comprehensive change management documentation and communication plans during major restructuring, improving employee engagement by 20%.
- Developed and monitored change schedules to track adoption progress and ensure minimal disruption during transitions.
- Designed and facilitated training programs for technology rollouts, achieving a 25% improvement in overall efficiency.
- Designed CRM implementation strategies, improving workflow efficiency and reducing SLA response times by 42%.
- Facilitated training sessions and developed communication plans, improving adoption rates and fostering a culture of continuous improvement.

EDUCATION

Master of Economics- University of Texas at Dallas (expected graduation Dec 2026)

SKILLS

- Lean Six Sigma Black Belt
- Advanced Analytics & KPI Reporting
- Executive Communication & Storytelling
- Process Mapping, Redesign & Automation
- Statistical Modeling & Econometrics
- R (Tidyverse, Shiny), SQL
- Data Visualization & Dashboarding
- Machine Learning (Foundational)
- Stakeholder Communication & Cross-functional Collaboration
